

VISHWA S.H

Data Analyst | Business Intelligence Analyst | Python Development
vishwakutty0305@gmail.com | +91 9444906210 | Chennai, Tamil Nadu | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Hands-on experience building BI dashboards and SQL-based data pipelines, with strong skills in Python, Power BI, SQL, and Pandas. Proficient in data cleaning, transformation, and exploratory data analysis (EDA) to uncover meaningful patterns. Experienced in creating interactive dashboards and performing KPI and trend analysis to support business insights. Adept at converting raw data into actionable insights that improve efficiency and decision-making. Actively seeking Data Analyst or BI Analyst roles to apply analytical and problem-solving skills in real-world scenarios.

TECHNICAL SKILLS

Programming Skill: Python, MySQL, Pandas, NumPy, Matplotlib, Seaborn

Data Visualization & BI Tools: Power BI, Excel

Databases: SQL (Joins, Aggregations, Queries)

Data Handling: Data Cleaning, Data Transformation, ETL

Statistical Analysis: Descriptive Statistics, Trend Analysis, Correlation, Causation

Other Tools: AI Tools

PROJECTS

Power BI Dashboard — Bread Nutrition Analysis

Power BI, DAX, Power Query

- Engineered an interactive dashboard analyzing 50+ bread products using Power Query for automated ETL and DAX for dynamic KPI measures, cutting manual analysis time by ~60%.
- Delivered actionable insights across nutrition profiles, pricing tiers, and ingredient comparisons — enabling faster product benchmarking decisions.

Power BI Dashboard — Attendance Analysis

Power BI, DAX

- Built an automated attendance tracking dashboard using DAX measures and visual drill-throughs, improving reporting efficiency by ~50% compared to manual spreadsheet workflows.
- Surfaced attendance trends and manager performance patterns across teams, enabling proactive HR interventions.

EV Market Analysis

SQL, Power BI

- Queried and analyzed 50K+ EV registration records using SQL (joins, aggregations, window functions) to identify adoption trends, top manufacturers, and geographic distribution.
- Built Power BI dashboards surfacing regional growth patterns, translating raw government data into executive-ready insights.

Movie Recommendation System

Python, Scikit-learn, Pandas

- Developed a content-based recommendation engine using TF-IDF vectorization and cosine similarity on 1,000+ movie records, improving recommendation relevance by ~30%.
- Optimized data pipelines with Pandas, reducing query response time by 20% through efficient feature extraction and similarity scoring.

AI-Powered Convoy Route Optimization System

FastAPI, LightGBM, MySQL

- Designed a predictive route optimization system using LightGBM for risk-aware path selection and FastAPI for real-time REST API endpoints, improving route efficiency by ~25%.
- Integrated MySQL for dynamic input handling, enabling scalable multi-convoy scenario computation.

EXPERIENCE

Python Intern · RETECH Solutions, Chennai

Feb 2024 – Mar 2024

- Applied Python libraries (Pandas, NumPy, Matplotlib, Seaborn) to real-world data preprocessing, exploratory analysis, and visualization tasks across company datasets.
- Delivered cleaned, analysis-ready datasets and visual reports, gaining industry exposure to end-to-end data workflows.

EDUCATION

B.Tech — Artificial Intelligence & Data Science · CGPA: 8.2 / 10

2022 – 2026

Dhaanish Ahmed College of Engineering, Chennai (Anna University affiliated)

CERTIFICATIONS & AWARDS

 **Special Mention** · Anna University — Operation Trinetra 24-Hour Hackathon (Sep 2025)

- AWS Academy Cloud Foundations** · Amazon Web Services
- Joy of Computing with Python** · NPTEL (IIT Madras)
- Data Science & Artificial Intelligence** · Mind Luster
